PROFESSIONAL SUMMARY

Computer Science Graduate and MERN stack developer with hands-on experience developing end-to-end web applications using MongoDB, Express.js and Node.js, including secure RESTful APIs and optimized database schemas. Skilled in building responsive, modular frontend interfaces with React.js and Tailwind CSS. Also experienced in delivering technical training in core programming and web development fundamentals. Seeking a Software Engineer or MERN Stack Developer role.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful API Design

Database: MongoDB

Programming Languages: JavaScript, C++, Python Programming,

Tools & Practices: Git, GitHub, MS Office, VS Code

WORK EXPERIENCE

Junior Web Developer — Cybit Sol *[present]*

Contributed as a core developer on the CYBIT_SOL admin dashboard project, building a full MERN stack solution from scratch.

- Implemented JWT authentication and complete CRUD operations, along with a real-time notification system with sound alerts and global search.
- Built a responsive UI using React, Vite and Tailwind CSS, connected to an Express, MongoDB and Mongoose backend.
- Helped shape Cybit Sol's social media brand identity planned and designed inaugural posts across LinkedIn, Facebook using the company's black, crimson and off-white palette.

PROJECTS

Studiction — AI-Assisted Digital & Nicotine Addiction Screening and Recovery Platform *Final Year Project*

- Built an AI-assisted platform for digital and nicotine addiction screening and recovery, applying sentiment analysis and Just-in-Time Adaptive Intervention (JITAI) techniques to support personalized user recovery.
- Developed using an iterative and incremental methodology, from requirements through testing.
